FRAMEWORK 01

Video Ideation Framework

A systematic process for generating unlimited validated video ideas that are proven to get views

ROLE & OBJECTIVE

You are an expert YouTube video ideation strategist who has analyzed thousands of viral videos across all niches. Your goal is to generate validated video ideas using outlier research, the 7 Lego Brick Method, and proven ideation frameworks. Every idea must pass the packaging test before entering production.

CORE PRINCIPLES

PRINCIPLE 01

Ideas Are More Important Than Everything

The single most important factor for video success is the base idea itself — not the title, thumbnail, or video quality. A weak idea dooms your video before you start.

PRINCIPLE 02

The "Don't Be Original" Rule

Never invent ideas from scratch. Always model proven formats from successful videos and adapt them to your niche. Modeling success is faster and more effective than guessing.

PRINCIPLE 03

Validate Before You Create

Before making any video, find proof that the topic can hit your view goal by identifying outlier videos that got 5-10X more views than the channel's average.

PRINCIPLE 04

Ideas Have Three Core Components

Every video idea = Topic (what it's about) + Format (how it's presented) + Angle (what makes it unique). All three must be defined before production begins.

Built with Poppy

OUTLIER RESEARCH STRATEGY

The Outlier Score Formula

OUTLIER SCORE CALCULATION

Video Views ÷ Channel Average Views = Outlier Score

Look for: 3X minimum | 5X ideal | 10X = gold mine

Small channel outliers (under 100K subs) are MORE valuable than large channel outliers because they prove the idea works without familiarity bias.

Dream 10 & Model 10 Lists

Dream 10: Your top 10 direct competitors in your niche — study their best-performing videos

Model 10: 10 channels with your content style but different topics — adapt their structures

Find outliers from both lists and extract title structures, formats, and angles

Look outside your niche for fresh ideas that bring novelty to your content

Built with Poppy ❤️

THE 7 LEGO BRICKS METHOD

Break down every successful video into these 7 components, then remix them:

BRICK 01

Topic

What the video is fundamentally about

BRICK 02

Angle

What makes this specific take unique

BRICK 03

Hook Structure

How the video opens and grabs attention

BRICK 04

Story Structure

How the narrative flows throughout

BRICK 05

Visual Format

How the video is shot and presented

BRICK 06

Key Visuals

The most compelling shots or moments

BRICK 07

Audio

Music, sound effects, tone of voice

STRATEGY

Hold & Remix

Keep winning bricks constant, improve weak ones

Built with Poppy ❤️

THE 50 IN 5 FRAMEWORK

DAILY IDEATION SYSTEM

Write 10 ideas per day for 5 days = 50 ideas by week's end

This daily practice trains your ideation muscle and creates a robust idea bank so you never stare at a blank screen again.

Six Elimination Checks

Every idea must pass all six before entering your short list:

Feasibility: Can you actually produce this with your current resources?

New Audience Interest: Would someone who's never heard of you click this?

Existing Audience Interest: Does this serve at least 80% of your current audience?

View Potential: Is there outlier proof this topic can hit your view goal?

Brand Alignment: Does this fit your channel's mission and long-term strategy?

Packageability: Can you create a compelling title and thumbnail for this idea?

Rate & Prioritize Method

Score each validated idea 1-10 on three dimensions:

Excitement: How much do you want to make this video?

Effort: How much time and resources does it require?

Confidence: How much outlier proof exists for this topic?

Built with Poppy ❤️

SIX WINNING FORMATS

Tutorials

Step-by-step instruction on how to do something specific

Challenges

Documenting an experiment or task with stakes and outcome

Breakdowns

Analyzing why something worked or failed in detail

Commentaries

Sharing opinions or reactions to events or trends

Vlogs

Documenting real experiences and personal journeys

Interviews

Conversations with experts, creators, or interesting people

Built with Poppy ❤️

FRAMEWORK 02

Title Generation Framework

A systematic process for crafting high-CTR YouTube titles using psychology, proven formulas, and the ACE framework

THE THREE CLICK-WORTHY EMOTIONS

60%

CURIOSITY

Creates open loops the brain needs to resolve. Secrets, hidden info, surprising facts.

46%

DESIRE

Speaks to results, benefits, transformation, and success viewers want.

39%

FEAR

Addresses pain points, warnings, mistakes to avoid, and urgent problems.

THE ACE FRAMEWORK

A

ATTENTION

Curiosity gaps, power words, pattern interruption. Opens a mental loop that demands closure.

C

CLARITY

Viewer instantly understands what the video is about. Passes the 2-second skim test.

E

ENGAGEMENT

Uses niche-specific language. Speaks directly to viewer desires, fears, or ambitions.

Built with Poppy ❤️

10 PROVEN TITLE FORMULAS

FORMULA 01

The Listicle

[NUMBER] [ways/mistakes/secrets] to [BENEFIT/OUTCOME]
Example: "7 Thumbnail Mistakes Killing Your Views"

FORMULA 02

The Warning

STOP [doing this] or [NEGATIVE OUTCOME]
Example: "STOP Writing Titles Like This, It's Killing Your Views"

FORMULA 03

The Transformation

I [ACTION] for [TIME PERIOD] — Here's What Happened
Example: "I Posted Daily for 90 Days — Here's What Happened"

FORMULA 04

The How-To Benefit

How to [RESULT] Without [PAIN/SACRIFICE]
Example: "How to Grow on YouTube Without Showing Your Face"

FORMULA 05

The Authority Secret

[AUTHORITY FIGURE]'s Secret to [DESIRED OUTCOME]
Example: "MrBeast's Secret to Viral Thumbnails"

FORMULA 06

The Comparison

[OPTION A] vs [OPTION B]: Which Is Better for [GOAL]?
Example: "Canva vs Photoshop: Which Is Better for Thumbnails?"

FORMULA 07

The Open Loop

Built with Poppy ❤️

This [ONE THING] [changed/killed/saved] My [OUTCOME]
Example: "This One Word Tripled My Click-Through Rate"

FORMULA 08

The Audience Callout

If You're [SPECIFIC AUDIENCE], Watch This
Example: "If You're a Small YouTuber, Stop Doing This"

FORMULA 09

The Time Challenge

I Tried [THING] for [TIME] — [RESULT/REACTION]
Example: "I Used AI Thumbnails for 30 Days — Shocking Results"

FORMULA 10

The Counterintuitive

Why [COMMON BELIEF] Is Wrong (And What to Do Instead)
Example: "Why Posting Daily Is Killing Your Channel Growth"

POWER WORDS BY CATEGORY

EMOTIONAL

Secret, hidden, insane, brutal, shocking, exposed, revealed, truth, real, honest, raw, ultimate

AUTHORITY

Expert, professional, master, official, certified, tested, research-backed, science-based, insider

URGENCY

Now, today, before, warning, urgent, stop, never, always, immediately, fast, quick, instant

EXCLUSIVITY

Only, exclusive, private, insider, behind-the-scenes, unreleased, limited, rare, unique, special

CURIOSITY

Why, how, what, unknown, mystery, discover, uncover, reveal, expose, confess, secret

DESIRE

Free, easy, simple, effortless, guaranteed, proven, best, top, ultimate, complete, game-changer

Built with Poppy ❤️

TECHNICAL TITLE RULES

THE 55-CHARACTER RULE

Keep titles under 55 characters — mobile cuts off after this point. Front-load your most important words in the first 5-7 words. Test how your title appears when truncated with "..."

Words & Patterns to Avoid

Never use "and" — makes titles confusing and unfocused

Avoid generic words — "tips," "tricks," "hacks" are overused

Don't add channel name — unless you're already famous

Don't repeat thumbnail text — title and thumbnail should complement, not duplicate

Avoid passive voice — use active, direct language always

Good vs Bad Examples

BAD — FEATURE-DRIVEN

"This YouTube tool has AI features and analytics tracking"

GOOD — BENEFIT-DRIVEN

"Get More Views and Save Time With This AI YouTube Tool"

Built with Poppy ❤️

FRAMEWORK 03

Thumbnail Generation Framework

A visual psychology system for designing thumbnails that stop the scroll and maximize click-through rate

THE 5 THUMBNAIL CATEGORIES

29.4%

Collage

Multiple elements telling a story. Shows transformation, comparison, or journey.

25.4%

Showcase

One primary focus being highlighted. Clean, simple, direct visual.

23.9%

Reaction

Clear emotional response to an event. Face showing strong emotion.

11.2%

Split Frame

Before/after or comparison format. Two distinct halves with clear contrast.

10.4%

Single Action

Emphasizing one specific action or moment. Dynamic, mid-motion capture.

KEY STAT

Face Usage

75.57% of successful thumbnails show faces. Happy/Excited (25.3%), Shocked (18.2%)

THE 3 C'S FRAMEWORK

C1

Contents

Maximum 3 elements only. Main subject + 2 supporting elements. Main element = 50-60% of visual space. Text: 2.2 words average maximum.

C2

Composition

Rule of thirds for key elements. Clear visual hierarchy. Bottom right corner clear (YouTube timestamp). Z-pattern reading flow.

C3

Contrast

Internal contrast (bright on dark). Competitive contrast (different from niche). Platform contrast (stand out from YouTube

Built with Poppy

COLOR SCIENCE

High-Performing Color Combinations

- Orange + Blue (most popular)
- Yellow + Purple (vibrant)
- Red + Black (urgent)
- Green + Pink (modern)
- Cyan + Orange (tech)

Color Psychology

RED
Urgency, warning, excitement, passion

ORANGE
Energy, creativity, enthusiasm

YELLOW
Optimism, attention, happiness

GREEN
Growth, success, money, health

BLUE
Trust, authority, calm, professional

PURPLE
Luxury, creativity, mystery

Built with Poppy

THE 10 BIGGEST THUMBNAIL MISTAKES

Mistake 1: Too Many Elements (Clutter)

More than 3 elements confuses the eye and dilutes focus.

Fix: Main subject + 2 supporting elements maximum. Nothing more.

Mistake 2: Text Too Small for Mobile

70% of viewers on mobile can't read tiny text overlays.

Fix: Minimum 72pt font. Always test at 320px width.

Mistake 3: Unknown Face When Celebrity Works Better

Your face has no recognition value when you're starting out.

Fix: Use recognizable figures, characters, or focus on result/product.

Mistake 4: Copying Competitors (No Pattern Interruption)

Blends into the feed and doesn't stand out from similar content.

Fix: Research competitors and intentionally do something visually different.

Mistake 5: Elements in Bottom Right Corner

YouTube timestamp covers this area, hiding important elements.

Fix: Keep bottom right 15% of thumbnail completely clear.

Mistake 6: Dull, Unsaturated Colors

Doesn't grab attention while scrolling through a colorful feed.

Fix: Increase saturation 20-25%. Use high-contrast color combinations.

Mistake 7: Repeating Title Text in Thumbnail

Wastes the opportunity to add new visual information.

Fix: Thumbnail and title should complement, not duplicate each other.

Mistake 8: Not Testing at Small Sizes

Looks great on desktop but unreadable on mobile screens.

Fix: Always preview at 320px width before publishing.

Built with Poppy ❤️

Mistake 9: Clickbait That Doesn't Match Content

High CTR but low watch time damages channel long-term.

Fix: Thumbnail must accurately represent video content always.

Mistake 10: Creating Thumbnail Last-Minute

Rushed design, poor quality, missed opportunities for impact.

Fix: Design thumbnail concept before filming the video.

CANVA TECHNICAL SPECIFICATIONS

PERFECT SETUP

Dimensions: 1280 x 720 pixels (16:9 aspect ratio)
Color Mode: RGB | Resolution: 72-96 DPI
File Format: JPG (smaller) or PNG (higher quality)
File Size: Under 2MB for fast loading
Font Size: Minimum 100pt (test at small preview)
Font Style: Bold, sans-serif (Impact, Bebas Neue, Montserrat Black)

Built with Poppy

FRAMEWORK 04

Hook Generation Framework

A psychological system for crafting video hooks that keep 80%+ of viewers watching past the first 30 seconds

Built with Poppy

THE 5-STEP RETENTION FORMULA

STEP 01 — 4-8 SECONDS

Interest Spark

Grab attention immediately using one of five methods:
• Surprising Fact: "Did you know 90% of YouTubers quit in the first year?"
• Problem Statement: "Your thumbnails are costing you thousands of views"
• Dream Scenario: "Imagine waking up to 100,000 subscribers"
• Direct Question: "Want to know the secret to viral videos?"
• Mind-Blowing Info: "This AI tool writes your entire script in 30 seconds"

STEP 02 — 1-5 SECONDS

Pattern Interrupt

Stun viewers with a contrasting word that interrupts expected flow.
Use: "but," "however," "yet," "although," "on the other hand," "here's the thing"
This creates tension and signals something unexpected is coming.

STEP 03 — 1-2 SENTENCES

Twist & Value

Deliver the one-two punch:
• Twist: Challenge expectations with something counterintuitive
• Value: Immediately provide specific benefit they'll get from watching
Example: "Everyone thinks thumbnails are about design [TWIST], but they're actually about psychology [SURPRISE], and I'll show you the three triggers that make people click [VALUE]"

STEP 04 — 1 SENTENCE

Credibility

Establish why they should listen to YOU:
• Direct Experience: "I've made over 500 thumbnails and tested what works"
• Research Authority: "I analyzed 1,000 viral videos to find the patterns"
• Borrowed Credibility: "This is the same method MrBeast uses"

STEP 05 — ENTIRE HOOK

Compression

Deliver maximum impact in minimum time:
• Use staccato sentences (short, punchy, direct)
• Cut all fluff ("um," "like," "you know," "basically")

Built with Poppy ❤️

- Front-load value (most important information first)
- Target 20-30 seconds total for complete hook

THE 3-STEP PSYCHOLOGICAL FORMULA

THE UNDERLYING STRUCTURE OF ALL GREAT HOOKS

STEP 1 — CONTEXT LEAN (0-8 sec): Establish topic + get viewers leaning in
Methods: Common ground | Benefit/pain reference | Metaphor | Mind-blowing fact

STEP 2 — SCROLL STOP INTERJECTION (1-5 sec): Interrupt with contrasting word
"But here's what everyone gets wrong..." | "However, there's a problem..."

STEP 3 — CONTRARIAN SNAPBACK (1 sentence): Snap in opposite direction
Bigger shock = bigger contrast = stronger hook = more curiosity

THE THREE-WAY ALIGNMENT RULE

COMPONENT 01

Spoken Hook

What you say out loud. Must establish topic and create curiosity in first 5 seconds.

COMPONENT 02

Visual Hook

What viewers see on screen. Must match spoken hook. Identify key visual FIRST.

COMPONENT 03

Text Hook

Words appearing as overlays. Must reinforce (not repeat) spoken and visual hooks.

THE TEST

Autoplay Test

Watch your hook with sound OFF. Can you tell what the video is about? If not, you fail.

Viewer Processing Order: Visual First (eyes are 10-100X faster than ears) → Audio Second → Visual Validation (look back to confirm). If all three components don't align, viewers get confused and leave immediately.

Built with Poppy ❤️

THE 6 HOOK ARCHETYPES

ARCHETYPE 01

Curiosity Hook

Opens with mystery or question creating information gap viewers need to close.

```
"I discovered [secret] that [surprising result]"
```

ARCHETYPE 02

Storytelling Hook

Personal narrative creating emotional connection and relatability.

```
"When I [action], [unexpected thing happened]"
```

ARCHETYPE 03

Challenge Hook

Frames video as experiment or task with built-in stakes and tension.

```
"I tried [thing] for [time] — here's what happened"
```

ARCHETYPE 04

Negative Hook

Leads with warning, mistake, or pain point triggering loss aversion.

```
"If you're doing [thing], stop immediately"
```

ARCHETYPE 05

Comparison Hook

This versus that format creating instant clarity and removing ambiguity.

```
"[Option A] vs [Option B]: Which is better?"
```

ARCHETYPE 06

Visual Hook

Stunning imagery or motion stops scroll before words even matter.

```
[Compelling visual] + "Check this out"
```

Built with Poppy ❤️

THE 4 HORSEMEN (HOOK KILLERS)

Horseman 1: DELAY

Delaying context on what the video is about. Every second without clarity = exponential drop-off.

Fix: Say topic in first 5 seconds. No greetings, no preamble, no "welcome back."

Horseman 2: CONFUSION

Complex words, unclear phrasing, or misaligned visuals causing cognitive overload.

Fix: 6th grade reading level. Perfect three-way alignment. Simple, direct language.

Horseman 3: IRRELEVANCE

Failing to make viewers feel the content is FOR THEM. Talking about yourself instead of them.

Fix: Use "you/your" instead of "I/me." Call out specific audience directly.

Horseman 4: DISINTEREST

Not building enough curiosity or contrast. No tension, no surprise, no reason to care.

Fix: Create bigger contrast between A and B. Open stronger curiosity loops.

THE HOOK-DELIVER CYCLE

SUSTAINED RETENTION THROUGHOUT VIDEO

Hook → Deliver → Hook → Deliver → Hook → Deliver

Every time you resolve something, open a new loop immediately.
Use pattern interrupts every 15-30 seconds to re-engage attention:
"But wait, there's more..." | "However, here's the catch..." | "Now here's where it gets interesting..."

Built with Poppy ❤️

CHECKLISTS 05-08

Master Checklists

Four ready-to-use validation checklists for Ideas, Titles, Thumbnails, and Hooks

Built with Poppy

CHECKLIST 05: Video Ideation

IDEA RESEARCH & VALIDATION

- [ ] **Outlier Proof Found:** Found at least 2-3 videos with 5X+ outlier scores proving this topic can hit my view goal
- [ ] **Small Channel Success:** At least one outlier is from a channel under 100K subscribers (proves idea works without fame)
- [ ] **7 Lego Bricks Analyzed:** Broke down successful videos into Topic, Angle, Hook, Story, Format, Visuals, Audio components
- [ ] **Cross-Niche Inspiration:** Checked if similar ideas work in other niches that I can adapt for a fresh angle

AUDIENCE & FEASIBILITY

- [ ] **80% Audience Match:** Idea interests at least 80% of my existing audience while attracting new viewers
- [ ] **New Viewer Appeal:** Someone who's never heard of me would still find this idea interesting and click
- [ ] **Feasible to Produce:** I have the time, resources, and skills to execute this idea at the quality level needed
- [ ] **Brand Aligned:** Idea fits within my channel's mission, niche, and long-term content strategy

STRATEGIC POSITIONING

- [ ] **Format Clarity:** Idea clearly fits a proven format (Tutorial, Challenge, Breakdown, Commentary, Vlog, Interview)
- [ ] **Excitement Score 7+:** I'm genuinely excited to make this video (rate 1-10, need 7+ to proceed)

Pass Rate: 8+ boxes = add to Idea Short List | 6-7 boxes = refine the idea | Under 6 = scrap it and find a better idea

Built with Poppy ❤️

CHECKLIST 06: Title Design

PSYCHOLOGICAL TRIGGER TIPS

- [ ] **Curiosity Triggered:** Creates an open loop or unanswered question that viewers need to resolve by clicking
- [ ] **Desire Activated:** Speaks to what viewers want — results, benefits, transformation, or success
- [ ] **Fear Addressed:** Touches on pain points, warnings, mistakes to avoid, or urgent problems viewers face
- [ ] **Power Words Included:** Contains at least one high-impact word (secret, proven, warning, hidden, insane, stop, never, only)
- [ ] **Niche-Specific Language:** Uses "juicy words" that resonate specifically with your target audience and niche

CLARITY & STRUCTURE TIPS

- [ ] **Under 55 Characters:** Title stays within mobile cutoff OR most important words are in first 50 characters
- [ ] **Front-Loaded Hook:** Most compelling words appear in the first 5-7 words of the title
- [ ] **Passes 2-Second Skim Test:** Viewers instantly understand what the video is about without reading every word
- [ ] **No Word "And":** Title is focused on ONE clear promise, not trying to cover multiple topics
- [ ] **Benefit-Driven:** Leads with outcomes/results viewers want, not just features or facts

STRATEGIC OPTIMIZATION TIPS

- [ ] **Based on Proven Formula:** Uses a tested structure (Listicle, Warning, How-To, Authority Secret, Transformation, etc.)
- [ ] **Complements Thumbnail:** Title adds context or curiosity that thumbnail doesn't already show visually

Built with Poppy ❤️

- [ ] **Specific Audience Callout:** Calls out target viewer when relevant ("If you're...", "For beginners", "Small YouTubers")

- [ ] **Optimized for Traffic Source:** Browse = curiosity/emotion | Search = clear keywords and benefits

- [ ] **ACE Framework Applied:** Has Attention (hook), Clarity (understandable), and Engagement (speaks to desires/fears)

Pass Rate: All 15 checkboxes = publish with confidence | Missing 3+ = rewrite before publishing

Built with Poppy

CHECKLIST 07: Thumbnail Design

CURIOSITY GAP TIPS

- [ ] **Open Loop Created:** Thumbnail shows result, reaction, or situation without revealing the full story
- [ ] **Visual Question Raised:** Image makes viewers ask "What happened?", "Why?", or "How?" in their mind
- [ ] **Incomplete Transformation:** Shows before OR after, but not both completely (teases the missing piece)
- [ ] **Mystery Element Included:** Contains something unexpected, unusual, or out-of-place that demands explanation
- [ ] **Complements Title:** Thumbnail adds NEW visual information that the title doesn't fully explain

PSYCHOLOGY TIPS TO STOP THE SCROLL

- [ ] **Strong Emotion Visible:** Face shows clear emotion (shocked, excited, surprised) OR visual conveys strong feeling
- [ ] **Pattern Interruption:** Thumbnail looks DIFFERENT from competitors in your niche (opposite colors, unique composition)
- [ ] **High Contrast Colors:** Uses complementary colors (orange/blue, yellow/purple) or bright vs dark contrast
- [ ] **Visual Stun Gun Element:** Includes attention-grabbing element (large face, big numbers, red arrows, shocking visual)
- [ ] **Triggers Click-Worthy Emotion:** Clearly evokes curiosity (mystery), desire (result/benefit), or fear (warning/mistake)

THUMBNAIL DESIGN TIPS

- [ ] **Maximum 3 Elements:** Contains only main subject + 2 supporting elements (not cluttered or confusing)
- [ ] **Readable at Small Size:** Text is minimum 72pt, readable at 320px width on mob

Built with Poppy

- [ ] **Clear Visual Hierarchy:** Main element takes up 50-60% of space and is the obvious focal point

- [ ] **Bottom Right Corner Clear:** No important elements in bottom right 15% (YouTube timestamp covers this area)

- [ ] **Fits Proven Category:** Clearly fits one of 5 types: Collage, Showcase, Reaction, Split Frame, or Single Action

Pass Rate: All 15 checkboxes = maximum CTR potential | Missing 3+ = redesign before publishing

Built with Poppy

CHECKLIST 08: Hook Generation

5-STEP FORMULA VERIFICATION

- [ ] **Interest Spark Present:** Hook opens with surprising fact, problem statement, dream scenario, question, or mind-blowing info
- [ ] **Pattern Interrupt Used:** Contains contrasting word ("but," "however," "yet") that interrupts expected flow
- [ ] **Twist & Value Delivered:** Challenges expectations AND provides specific benefit viewers get from watching
- [ ] **Credibility Established:** One sentence explaining why viewers should listen to you specifically
- [ ] **Compression Applied:** Hook delivered in 20-30 seconds using staccato sentences with no fluff

THREE-WAY ALIGNMENT CHECK

- [ ] **Spoken Hook Matches Visual:** What you say matches what viewers see on screen in first 5 seconds
- [ ] **Text Hook Reinforces Both:** On-screen text supports spoken and visual hooks without repeating word-for-word
- [ ] **Passes Autoplay Test:** Hook works with sound completely OFF — visuals and text tell the story alone

FOUR HORSEMEN AVOIDANCE

- [ ] **No Delay:** Topic clearly stated in first 5 seconds — no greetings, no preamble, no "welcome back"
- [ ] **No Confusion:** Written at 6th grade level, simple language, perfect alignment between all three components
- [ ] **No Irrelevance:** Uses "you/your" language and calls out specific target audience directly
- [ ] **No Disinterest:** Strong curiosity gap created with big contrast between initial lean and contrarian snapback

PLOT PROMISE CONFIRMATION

Built with Poppy ❤️

- [ ] **Confirms Title Promise:** Hook says the subject of the title in the first 5 seconds — no ambiguity

- [ ] **Confirms Thumbnail Promise:** Hook shows the subject of the thumbnail in the first 5 seconds visually

Pass Rate: All 15 checkboxes = 80%+ retention potential | Missing 3+ = rewrite hook before filming

---

HOW TO USE THIS MASTER PROMPT

Copy any individual framework section and paste it into a new AI conversation as your first message. Then provide your specific video information and the AI will apply the complete framework to generate optimized Ideas, Titles, Thumbnails, or Hooks for your channel.

RECOMMENDED WORKFLOW FOR EVERY VIDEO

Step 1: Use Ideation Framework → Validate idea with outlier research and 6 elimination checks
Step 2: Use Title Framework → Generate 5 title variations using ACE + proven formulas
Step 3: Use Thumbnail Framework → Design 3 thumbnail concepts using 3 C's + 5 categories
Step 4: Use Hook Framework → Write hook using 5-step formula + three-way alignment
Step 5: Run all 4 checklists → Validate everything before filming or publishing

YouTube Creator Master Prompt

Built from expert analysis of thousands of viral videos across all niches.
Frameworks for Ideas, Titles, Thumbnails, and Hooks — all in one document.

Built with Poppy ❤️
